## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 to 4 and 13, drawn to a magnet powder containing a rare earth element, a transition metal element and at least one element from the group consisting of boron, carbon and nitrogen having a magnetically soft and hard phase having a crystal particle size of 150 nm or less, classified in class 148, subclass 301+.
  - II. Claims 5 to 12, drawn to a method of making a powder containing a rare earth element, a transition metal element and at least one element from the group consisting of boron, carbon and nitrogen having a magnetically soft and hard phase comprising forming an alloy having some degree of amorphicity and recrystallized the alloy, classified in class 148, subclass 101.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another

Art Unit: 1742

and materially different process such as directly melt spinning the molten alloy to the desired crystal structure.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Stephen A. Becker on August 6, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
